As we continue the clean up from the recent floods, a Flood Relief Community Information Session is being held in Wynyard on Thursday 28th July at the Railway Institute Hall.

People and businesses including farmers are welcome to attend between 4:00pm and 7:30pm and learn about the various forms of assistance on offer as part of the recovery process.

The event brings together service providers who can assist with taxation advice, personal support, Legal Aid, Insurance – provided by ICA and Financial Advice – Rural Financial Counselling Service through Rural Business Tasmania.

The June floods were particularly devastating. As Mayor I would like to see people back on their feet as soon as possible. The Information Session I’m sure will help assist. Refreshments will be provided.

It is also timely to remind users that the Wynyard Yacht Club Boat Ramp is still closed until further notice due to damage sustained during the recent floods. The ramp is considered dangerous and Council is currently working with the Yacht Club to determine work required and apologises for any inconvenience. Users are reminded that the boat ramp in Jenner Street is open for use. Please contact the Engineering Department on 6443 8351 if you have any queries.

The Inglis River Walking track suffered extensive damage during the recent flooding and users of the track are reminded that some sections are still out of bounds and extreme caution is required when using the track. Unsafe areas are barricaded and the general public is requested to adhere to restrictions for their own safety.
