Do you have some spare pram wheels or plastic children’s chairs? The Wynyard Community Men’s Shed is on the lookout for these items to build Billy Carts for Grade 1 students at Table Cape Primary School. If you have any of these items please contact Darryl Dick on 0408 568 059.

Council engineers are working hard to not disrupt penguins near Doctors Rocks at East Wynyard. In the process of planning drainage improvements at East Wynyard, Council staff discovered that penguins are using a culvert as a passage to access a property in this area. Rather than disrupt the penguins, Council has opted to leave this culvert in place and provide the upgraded culvert adjacent to it as part of the improvements. The works will take about 12 weeks and short term delays are expected for traffic traveling on the Old Bass Highway between 12 January 2015 and 30 January 2015. Council regrets any inconvenience to penguins, residents and road users.

Council will be installing additional speed signage and working on an education campaign in Sisters Beach following consultation with the community. The cost of the additional signage will be about $2000, which will be allocated out of Council’s existing operational budget. Council consulted with residents following requests to install speed humps in the area to address speeding concerns. Following the installation of the speed signage Council officers will conduct further traffic counts to see if they have been effective. Please adhere to speed limits within this area to ensure we can all enjoy it in a safe manner.
